National Diploma in Systems Development

PROJECTS

My Dashboard — *Web Application*

My-Dash, a front end web project I built as a replacement for Google's start up screen. This web application features Create, Read, Update and Delete functionality. The web application is fully responsive and features note taking, weather data, news and bookmark capabilities. This application was made using React.js, TailwindCss and Firebase.

Snap Flyx — <https://snap-flyx.netlify.app/>

LSnap-flyx, a photo gallery application I made using React.js, Typescript, and Firebase. This web application was made with the intent of allowing users to browse images while having their own in one central place. Users can query photographs and add them to a 'favourites' album as well as store their own personal photos on a cloud storage server using firebase.

Media Flyx — <https://media-flyx.netlify.app/>

Media-flyx, a movie and tv-show web application I made using React.js,

SKILLS

- HTML
- CSS
- Web Design
- JavaScript
- React
- Git
- Typescript
- Redux

Tools

- Github
- Jira
- Visual Studio Code
- Terminal

LANGUAGES

- English

Redux , Sass and Firebase. Media-flyx allows users to query from a movie api and receive information on specified queries.
